									1. Collapsible Sidebar: Good 2. Responsive: Good 3. Scroll Handled and custom scroll style as per layout 4. Patient photo not rounded square 5. Missing Cursor pointer on buttons 6. Added JS functionality to add contact in Contact Detail section : Good 7. Added validations for the form 8. Scroll handled in Contact Details Section: Good 9. Used CSS Variables: Good 10. Code or some portions of code is copied from some other source 11. Inconsistent naming of classes 12. Missing/ incorrect functionality for age as per requirement; Score would have been 4 in JS if this was not missed 13. Created functions for reusability
Ruchit S	Yes	3	4	3.5	3.5	3.5	3	3.5	
Krunal Mungalpara	Yes		3.5	3	3.5	3.5	3.5		1. Good Detailing. Scroll managed correctly 2. Use of pseudo element for required indicator: good 3. Responsive: Good 3.4 4. Should avoid doing layout using HTML Tables
Saumya S	Yes	2	3	3	3.5	3.5	3.5	3.3	1. Form's label control alignment is not as per layout. 2. Added Collapsible sidebar using JS: GGood 3. Cursor pointer and hover styles added Good 4. Scroll managed, outer scroll for main Form section 5. Version comment in HTML: Good 6. Complete page could have been managed using single form, why created multiple forms in html ? 7. function naming consistent
Dhruvil Chaudhary	Yes		3	2.5	3	3	3	2.9	1. Scroll managed correctly. Add custom styling for scroll. Good. 2. Use class for styling on elements instead of id 3. Why is Fee Schedule select not working 4. Age besides DOB added static. Either not checked the complete functionality. If not implemented, should not have added hardcoded 5. Added validation on firstname , good 6. Cursor pointer on buttons missing 7. Required indicator on forms controls missing 8. Alignment of Delete button in Contact details is not correct 9. Contact preference table not implemented as per layout 10. Form Column layout responsive due to flex display. But need to take care of smaller resolution by making the columns full width 11. Code formatted : good
Meet V	Yes		3	3	2.5	3	3	2.9	1. Why added different background color to sidebar and tab menu background? 2. Should have taken more care for spacing of icons. IN general : spacing and 3. Not able to scroll in the sidebar 4. Added validations: good 5. Need to align delete buttons 6. + button different in contact details section from the layout shared 7. Missed the functionality of console log of filled data 8. Naming of the classes is consistent and with prefix: good
Shyam M	Yes		3	3	3	3	2.5	2.9	1. Why so much empty space at the top 2. Missing required indicators 3. Collapsible sidebars: Good 4. Responsive styling: Good; but why is it that first two columns are not collapsed and third column is collapsed ? 5. Incorrect functionality added for Age: Are you familiar with Patient contact in patient chart (from the product training) ? 6. Option1, Option 2 in all select buttons 7. Cursor pointer on button 8. Custom Scrollbar 9. When clicked on Contact preference control, table size increases. Can this be fixed ? 10. Why using rounded cells in contact preference table, is it part of the layout shared ? 11. Use - casing instead of snake casing for classes 12. Inconsistent naming of function why shortcut for submit(subt) used in function name ?
Vivek M	Yes		2.5	2.5	3	3	3.5	2.9	1. On clicking of the button, the layout shifts, 2. Asterisk for required fields added; Good 3. Collapsible sidebar: good 4. Sidebar Background color and form background color not same as the one provide in layout 5. Passing Argument in function for calculating age: Good 6. Do not use table for layout
Hemit Rana	Yes		3	2	3	2.5	3	2.7	0. Relative links to resources (css, js) not working, image used in the page not submitted with submission 1. Scroll managed correctly. Add custom styling for scroll. 2. Fields not aligned and width not set properly 3. Hover styling on link good. Labels are not properly cased. Need to emulate the layout as closely as provided. 4. Age besides DOB added static. Either not checked the complete functionality. If not implemented, should not have added hardcoded 5. Controls leaking out of container in lower resolution. Layout breaking. 6. Cursor pointer on buttons missing 7. Delete buttons are aligned correctly : Good 8. Need to resubmit with Form Styling Done 9. Separator added. Good 10. Button colors not provided 11. All styling done using classes: Good 12. Added column styling with 33% width : Good 13. More than required inline styles
Nikita M	Yes		2.5	2.5	3	3	2.5	2.7	1. Layout alignment breaks in higher resolution 2. Image aspect ratio not proper. image was square in the layout given 3. Why are the text inputs made deliberately smaller. Do they look good ? 4. Sections made in Menu: good 5. Hover effect on button + cursor: pointer on button: Good 6. Hover effect on menu links good 7. FormData, entries, Object.FromEntries 8. Calculated Age dynamically and set in HTML Page : Good
Priyank D	Yes		3	2.5	2.5	3	2	2.6	1. Scroll managed 2. Contact Detail Blocks handling smaller screen, but need to do the same implementation in Demographics form on top 3. Cursor pointer missing on buttons 4. Required indicator missing. 5. Border on Contact Details screen not looking good 6. hover styling on menu link missing 7. Emulated Contact Preference layout closely 8. Use - instead of camelCasing in classes 9. Added PD prefix for all classes. Good- what is the reason ?
Pranav C	Yes		2.5	2.5	2	3	2	2.4	1. Good naming of classes (eg: nav, nav-item) 2. Missed functionality of Showing alert for minor 3. Why is so much margin added on top? 4. Options in select buttons not added properly. Option1, option 2 added for all selections 5. Layout not completed 6. "NeVerity" Spelling mistake, Spelling mistake in other places as well 7. Patient photo is not square as per layout 8. No functions in Javascript
Raj P	Yes		2	1.5	3	3	2	2.3	1. Why is the styling not done to look like the layout provided ? What is the main reason ? 2. Patient photo is round instead of rounded square 3. Need to submit again with styling

Name	Submitted	# Of Submission	HTML Score	CSS Score	JS Score	Code clarity	Code reusability	Avg	Review Points
									1. Vertical and Horizontal Scroll on the whole page, but left menu is fixed. is this layout logically correct ? 2. Only the first level form logged in console in Javascript 3. Cursor pointer on button, Good 4. Alignment with respect to 5. All Links in left menu not added 6. Border radius and shadow not implemented 7. Layout created using tr, tbody. Need to implement the same using div 8. Check the message of the DOB. Copies as was given. Didn't try to understand the functionality required. Message shown is "Please add a contact for the Patient as he / she (depending on the gender), is a minor" 9. What was the need to deduct 1970 from the getFullYear ? 10. CSS Naming form1, form2, form3, display4. Should use proper names as per their use 11. Syntax error in CSS 12. Avoid styling using IDs. instead use classes only 13. Styling not close enough to the reference provided 14. agecalculator() could have taken dob as parameter and returned value 15. Same styling rules applied using multiple classes like .display4-form3 16. Should've used aside tag
Dhruv Joshi	Yes			2.5	2	2	2	1	1.9
Vivek J	Yes		NA	NA	NA	NA	NA		1. Scroll layout not handled correctly. Need to resubmit again 2. Do not use id for styling 3. Need to resubmit again with styling and complete JS functionality 4. Not complete form data is logged
Zeel G	Yes		NA	NA	NA	NA	NA		1. Need to resubmit again with styling and complete JS functionality
HTML: Scroll, layout, structure
